

Update on the proposed output-based pricing system

Multi-sector meeting
September 13, 2018

Output-based pricing system registration

Overview

- Who must register?
- Overview of registration process
- Timelines
- Details required for registration application
- Preview of draft registration screens and system flow

OBPS registration requirements

- Criteria for mandatory participants
 - Having reported **50 kt CO₂e or more** to the GHGRP for 2014 or a subsequent reporting year
 - Are operating in a backstop jurisdiction
 - Undertaking an activity/producing a product for which an OBS is prescribed (i.e. a covered activity is undertaken)
- Considering opening OBPS to voluntary opt-in for 2019 for facilities:
 - Emitting 10-50 kt CO₂e (reported to the federal GHG Reporting Program for 2017 or a subsequent year);
 - Located in a backstop jurisdiction; and
 - Undertaking an activity/producing a product for which an OBS is prescribed.

OBPS registration: overview of process

- Online registration – using existing GHGRP reporting application within ECCC's Single Window
- Existing GHGRP reporters will automatically have access
- Registration application form can be prepared in multiple sessions if needed (data retained)
- Submitted registrations will be reviewed by ECCC. Successful registrations will receive a **Covered Facility Certificate** by email from ECCC.
- The Covered Facility Certificate is required to register as an emitter with CRA and receive an **Exemption Certificate** which will allow for the delivery of charge-free fuel to the covered facility.

OPBS registration: ECCC timelines

- Facilities will need both certificates (Covered Facility and Exemption) in place by January 1, 2019 to avoid the fuel charge on purchased fuels.
- ECCC registration is targeted to start November 1, 2018.
- Recommend that stakeholders start the ECCC registration process as early in November as possible to avoid delays.
- Target date for facility registrations to be submitted: November 16, 2018
- Ensure that complete/detailed information is provided. ECCC review may take longer if follow up is required.

Registration information: responsible person

- The proposed approach based off of the regulatory framework will require the following information for the person responsible for the facility:
 - Legal name
 - English and French Trade Name
 - Federal Business Number
 - Physical address
 - Owner or operator
- Additional responsible persons can be identified on the registration form but the certificate will only be issued for the one submitting the registration application.

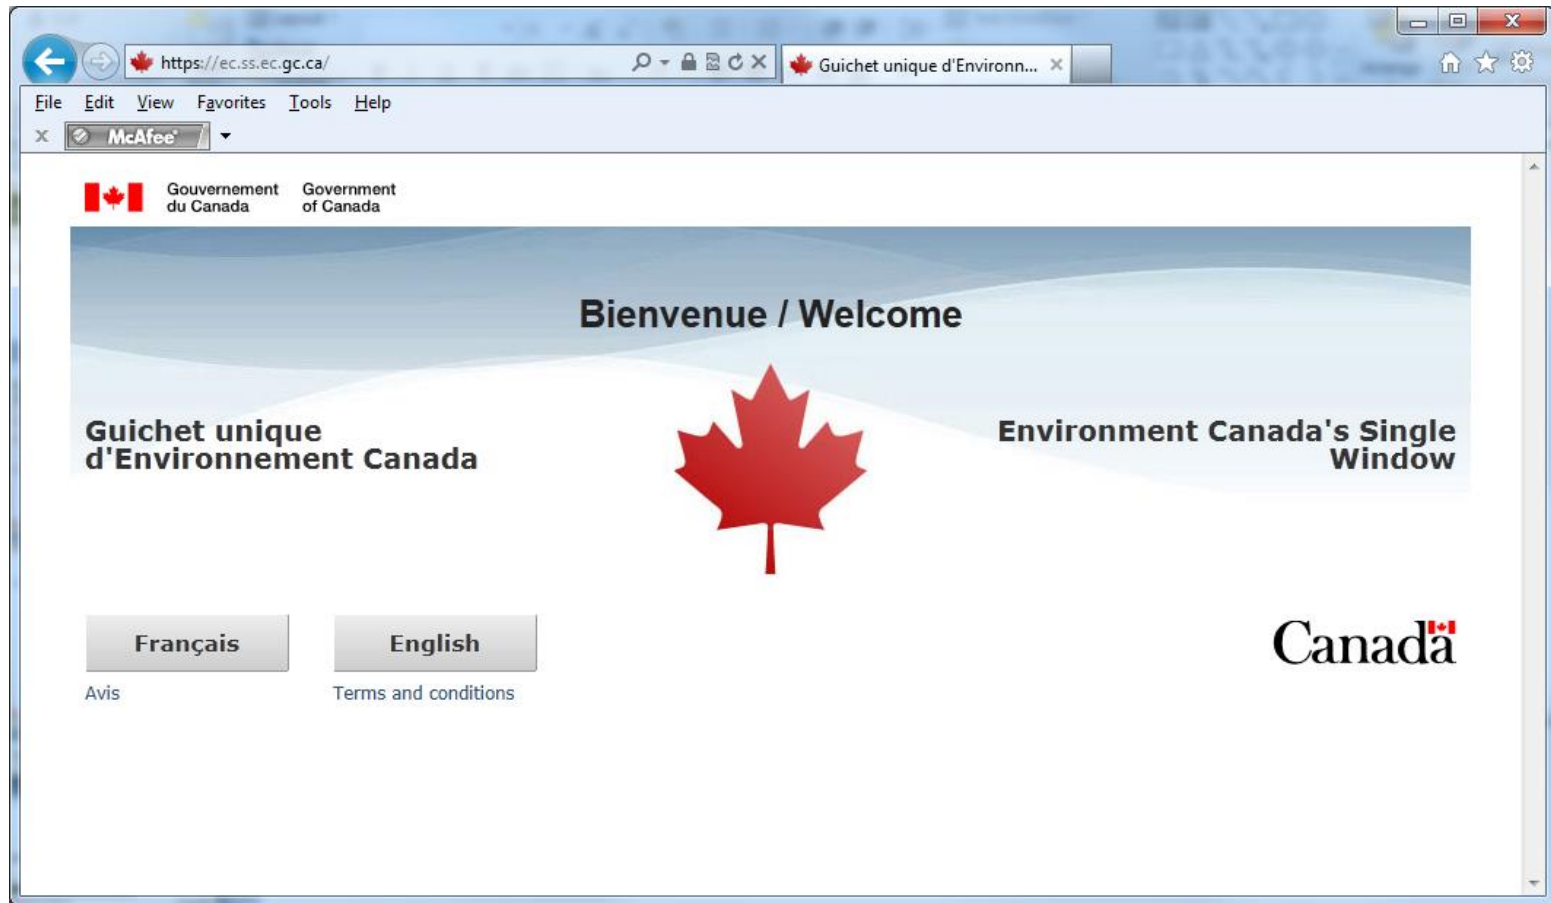

Registration information: authorized official

- Identify an authorized official
 - Name
 - Physical and mailing address
 - Job title
 - Email address, phone number
 - Proof of authority to act on behalf of the Responsible Person 
- Note: submission of the application form will require the signature of the authorized official on a complete copy of the form. 
- An additional contact person can be identified

Registration information: facility

- Information required for the facility:
 - Facility name
 - Physical address or geographical coordinates
 - NAICS Code, ECCC identifiers (GHGRP ID, NPRI ID)
 - Facility map 
 - Annual total reported GHG emissions from 2014-2017
 - System will automatically pull data from GHGRP
 - If OPBS facility differs from what reported to GHGRP, a detailed explanation is required 
 - Identification of the covered activity undertaken at the facility, details of the technology used to produce the product, and date you started the covered activity

Single Window Information Manager

Welcome Erin Crawley, to Environment Canada's Single Window.

The reporting program(s) listed below are reporting programs that you currently have access to. If you require others please request access through your organization administrator.

[BC Greenhouse Gas](#)

Greenhouse Gas Reporting for the province of British Columbia

[CEPA Pollution Prevention Planning](#)

Environment Canada's online reporting tool for persons subject to a Pollution Prevention (P2) Planning Notice published in the Canada Gazette under Part 4 of the Canadian Environmental Protection Act, 1999

[Chemicals Management Plan](#)

Jointly delivered by Environment Canada and Health Canada, the Chemicals Management Plan identifies and addresses environmental and health risks under various federal laws.

[ECCC and Partners Greenhouse Gas Reporting](#)

Environment and Climate Change Canada's Greenhouse Gas Emissions Reporting Program, Alberta's Greenhouse Gas Reporting Program and New Brunswick Environment and Local Government

[ePCB](#)

This database allows regulatees to submit their PCB reports online as required by the PCB Regulations.

[Export and Import of Hazardous Waste and Hazardous Recyclable Material Regulations \(EIHWHRMR\)](#)

This online system enables individuals and businesses to submit notices electronically for the import and export of hazardous wastes or hazardous recyclable materials, as well as obtain official documents (e.g. permits) online.

[ON Greenhouse Gas](#)

Greenhouse Gas Reporting for the province of Ontario

Welcome to the ECCG and Partners GHG Reporting module and the OBPS Registration module

The GHGRP application requires operators of facilities that meet the criteria specified in the annual notice with respect to reporting of greenhouse gases (GHGs), published in the Canada Gazette, to report facility GHG emissions to Environment and Climate Change Canada by the annual June 1st reporting deadline.

For further information on the notice, we encourage you to visit [Reporting Greenhouse Gas Emissions](#).

In jurisdictions where the backstop applies, the Output-based Pricing System (OBPS) will apply to industrial facilities that emit 50 kilotonnes (kt) CO₂e or more and for which an output-based standard (OBS) is specified, i.e. facilities at which a covered activity is undertaken.

The following facilities will also be allowed to voluntarily participate in the OBPS (opt-in), if their application for voluntary participation is approved:

- Facilities that emit between 10 and 50 kt CO₂e per year and at which an covered activity is undertaken;
- Facilities that emit 50 kt CO₂e per year or more and for which the undertaken activity falls within one of the Emission intensive and trade exposed (EITE) sectors, the sectors eligible to designation

For more information on the OBPS registration tool, we encourage you to visit the [OBPS guidance materials](#)

Dashboard

 Welcome to the OBPS online registration tool (ORT).

To start a new application to register select the "Create new application" button located in the lower right-hand corner of the page.

Once you begin a new application, the ORT navigates you through the application process for your facility. Once the required information has been entered for that facility, return to the ORT to submit your application.

- GHG emissions
- Application submission

Regulated parties

i Authorized Official and Contact Person Information can be selected from your SWIM Organization's account, from a drop-down list or manually entered. If you have multiple facilities that are subject to the OBPS located in your Organization, the recommended approach is to enter all Contact Person(s) and Authorized Official(s) Information into your SWIM Organization's account. This allows you to use the drop-down list to select the Authorized Official Information for each report thus reducing administrative burden and inaccuracy.

Once the message: "Success! This page has been saved successfully" appears, please move to the next item located on the Reporting Details menu - Additional Information.
